Acta Geodyn. Geomater., Vol. 19, No. 3 (207), 2022

| | |
|--|---------|
| <i>F. Kalateh, F. Hosseinejad and M. Kheiry</i> : UNCERTAINTY QUANTIFICATION IN THE ANALYSIS OF LIQUEFIED SOIL RESPONSE THROUGH FUZZY FINITE ELEMENT METHOD. | 177–199 |
| <i>N. A. Mokhtar, Nordiana M. Muztaza, M. Saidin, R. Saad, S. S. K. Masnan, N. A. Ismail, A. A. Bery, T. Y. Jia, S. Sapiai, M. T. Zakaria, N. Yunus, Norhidayahti M. Muztaza and N. El H. Ismail</i> : GEOPHYSICAL APPROACH TO IDENTIFYING ANCIENT IRON AT SUNGAI BATU SUNGAI BATU, BUJANG VALLEY, KEDAH, MALAYSIA | 201–217 |
| <i>A. Mohamed, H. Abdel-Hafiez and S. Ali</i> : CHARACTERISTICS OF THE FOUNDATION ROCKS USING GEOPHYSICAL TECHNIQUES: A CASE STUDY FOR THE EGYPTIAN SOLAR PLANT SITE, ASWAN, EGYPT. | 219–235 |
| <i>Y. Xiang, J. Yue, G. Liu and Y. Long</i> : MONTE CARLO MSA TO MODELING GNSS POSITION TIME SERIES AND ITS IMPLICATION FOR CRUSTAL DEFORMATION MONITORING. | 237–253 |
| <i>W. Li, M. Kačmařík and P. Pospíšil</i> : MULTI-GNSS POSITIONING FOR LANDSLIDE MONITORING: A CASE STUDY AT THE RECICA LANDSLIDE. | 255–270 |
